STANDARDS FOR PRESERVATION

The Secretary of the Interior's Standards for the Treatment of Historic Properties are designed to provide guidance for the development of preservation treatment plans. These standards are intended to ensure that the treatment of historic properties is carried out in a manner that respects their historical significance and integrity.

The standards are divided into several categories, including:

1. Treatment
2. Rehabilitation
3. Restoration
4. Repair
5. Replacement

Each category includes specific guidelines and criteria for evaluating and selecting appropriate preservation actions. The standards are intended to be flexible and adaptable to the unique characteristics of each historic property.

These standards are intended to be used as a basis for decision-making processes necessary to maintain the character of historic properties.
